Test Case

1. Purpose

The test case specification document for the Arithmetic Evaluator project specifies several test cases for the evaluation of the project's functionality. An excel file listing our test cases and their results can also be found in this repository, labeled "Test_Cases.xlsx".

NOTE: for sections 2, 3, 4, and 5: It is OK to use a table like the one proposed in class, also suggested on the project part 5 description.

2. Test case identifier

Test case identifiers are of the form TC##, where ## is a number identifying the specific test case. Our test cases range from TC01-TC30
